HITESH CHAUDHARI

Senior Software Engineer | Full-Stack | Tech Lead

Bengaluru | chaudharihitesh57@gmail.com | +91 8268946878 | linkedin.com/in/eng-hitesh-chaudhari | stackbyhitesh.github.io

PROFESSIONAL SUMMARY

- Senior Software Engineer with ~8 years of experience building and shipping enterprise-scale web and mobile applications used by 110M+ users.
- Full-stack depth across React, Angular, Next.js and TypeScript on the frontend and Node.js and Java microservices on the backend, backed by AWS, Azure, Docker, Kubernetes and CI/CD.
- Proven Tech Lead: guided a team of 6 engineers through architecture, sprint planning, code reviews and delivery in regulated fintech and enterprise environments.
- Early adopter of AI-assisted development, building custom GitHub Copilot agents and RAG-based tooling that speed up delivery.

KEY ACHIEVEMENTS

- **110M+ users:** Delivered 6 business-critical full-stack modules for a platform serving 110M+ users, across 20+ production releases with minimal defects.
- **Up to 18% faster APIs:** Designed multi-layer caching (frontend and Redis) and tuned queries and indexing, with response-time gains of 18% at OpenText, 14% at Bajaj Finserv and 11% at Chetu.
- **35K+ records rendered smoothly:** Removed a page-freezing issue on a high-volume data platform using virtual scroll, lazy loading and debounced input.
- **25% less boilerplate time:** Architected a RAG-based code assistant and a custom Copilot agent that enforce team conventions.
- **Team-wide adoption:** Built an Engineering CRM from scratch (Node.js and a frontend UI) for sprint tracking, automation and reporting, adopted by the whole team.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Java, HTML5, CSS3

Frontend: React, Angular, Next.js, Ionic, Progressive Web Apps (PWA), RxJS, NgRx, Redux Toolkit, React Hooks, Micro Frontends / Module Federation

UI and Styling: Tailwind CSS, Material UI (MUI), Angular Material, Responsive Design, Design Systems

Backend and APIs: Node.js, Java, REST APIs, GraphQL, Microservices Architecture

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud and DevOps: AWS, Azure, Docker, Kubernetes, CI/CD Pipelines, Git

Architecture: System Design, Scalable Architecture, Design Patterns, Caching Strategies, Database Indexing, Query and Performance Optimization

AI-Assisted Development: LLMs, GitHub Copilot (Agent Mode), Custom Coding Agents, OpenAI API, Anthropic API, Prompt Engineering, RAG, Vector DB, Semantic Search, LangChain, LlamaIndex

Payments and Security: Stripe, Razorpay, Bajaj Pay SDK, OAuth 2.0, JWT, SSO

Testing and Quality: Jasmine, Karma, JUnit, Cypress, Unit Testing (85%+ coverage), TDD, SonarQube

Practices and Tools: Agile/Scrum, Code Reviews, Mentoring, Postman, Requirements Translation, Production Support

PROFESSIONAL EXPERIENCE

Senior Software Engineer | OpenText | November 2025 – Present

- **Frontend performance:** Own performance of a high-volume enterprise data platform; implemented virtual scroll, lazy loading and debounced input to render 35K+ records smoothly and remove a page-freezing issue.
- **Caching:** Designed a multi-layer caching strategy (frontend and Redis) that cut average API response time by up to 18%, the largest performance gain across recent roles.
- **UI modernization:** Rebuilt key interface components with Material UI and Tailwind CSS to standardize design patterns, improve accessibility and speed up delivery of new screens.
- **AI tooling:** Built a custom AI coding agent in VS Code using GitHub Copilot Agent mode, with custom skills so generated code follows team architecture and conventions.
- **RAG assistant:** Architected a RAG-based code assistant for internal tooling, using prompt engineering to reduce boilerplate development time by 25%.

- **Platform engineering:** Enhance and maintain REST APIs and microservices in Node.js and Java for global enterprise customers, focused on scalability and reliability.
- **Quality:** Maintain 85%+ unit test coverage and CI/CD pipelines; drive code reviews, resolve production issues and follow test-driven development.

Senior Software Engineer (Tech Lead) | Bajaj Finserv | March 2023 – November 2025

- **Leadership:** Led and mentored a team of 6 engineers, owning full-stack architecture, sprint planning and delivery for modules used by 110M+ users.
- **Delivery:** Delivered 6 business-critical full-stack modules end-to-end, contributing to 20+ production releases with high reliability and minimal defects.
- **Internal tooling:** Designed and built an Engineering CRM from scratch (Node.js backend and frontend UI) for sprint tracking, workflow automation and reporting, adopted team-wide.
- **Performance:** Optimized database indexing and query performance alongside frontend and Redis caching, cutting average API response time by up to 14%.
- **Payments and security:** Integrated Bajaj Pay SDK into backend services for secure payments and implemented SSO-based authentication across core modules.
- **Engineering practices:** Built and maintained CI/CD pipelines and established best practices through structured code reviews and mentoring.

Senior Software Engineer | Chetu India Pvt. Limited | October 2021 – March 2023

- Designed scalable, microservices-based application architecture in Node.js for enterprise solutions with a strong focus on reliability.
- Built an offline-first hybrid mobile app with Ionic (iOS and Android) and a Node.js backend, with local persistence and background sync for unreliable networks.
- Integrated the Stripe payment gateway into Node.js services with OAuth 2.0 and JWT authentication for secure online billing.
- Ran load testing and performance tuning on Node.js APIs, contributing to an 11% reduction in average API response time while maintaining 85%+ unit test coverage.

Software Developer | VPGP Pvt. Limited (EasyNow) | April 2019 – June 2021

- Designed and built a full-stack CRM from scratch (Node.js backend and frontend UI) with role-based access control (RBAC) to automate customer workflows.
- Built a user portfolio module and subscription-based login and access control for tiered feature access by customer plan.
- Integrated the Razorpay payment gateway for secure billing and subscriptions; optimized database performance through indexing and query tuning.
- Built responsive interfaces, interactive dashboards and Node.js REST APIs with JWT authentication and automated workflows to reduce manual effort.

Junior Software Developer | Fleet Solution | September 2018 – April 2019

- Developed responsive web applications with cross-browser compatibility and accessibility best practices.
- Worked with stakeholders to translate business requirements into scalable software across the full feature lifecycle.

EDUCATION

- Master of Science in Information Technology, University of Mumbai | 2019 – 2021
- Bachelor of Science in Information Technology, Patkar College, University of Mumbai | 2015 – 2018

AWARDS AND CERTIFICATIONS

- **Hero's Award**, Bajaj Finance Limited | April 2024 – Recognized for exceptional contribution.
- **BFL Certified Prodigy**, Bajaj Finance Limited | October 2024 – Certified Mobile and Web App Developer.
- **Tech Titans Award**, Bajaj Finance Limited | August 2025 – Recognized for Module Federation and Single CodeBase.
- **Office Olympix, 1st Place** – Certificate of Achievement for exceptional performance.
